**> Back in stock next week... including a new model added to the range**  
 We never intended the stock gap to be quite so wide on this product, so when it became obvious that they were going to be late, we took advantage of the gap to add a new model to the range as we had been asked by many modellers to do so. As a result, there are now three ADS models. These are the original [ADS-8sx](#) 8 output and [ADS-2sx](#) 2 output models—and the new [ADS-4sx](#) four way variant.

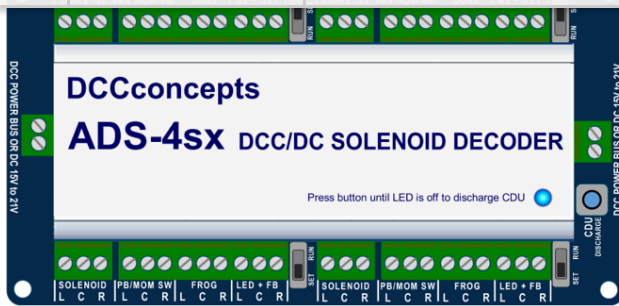

**> ADS Solenoid decoders now come in all the variations you have asked for!**

DCCconcepts ADS decoders are the best possible choice for any modeller who uses the 3-wire solenoid point motors sold by Peco, Hornby, Gaugemaster, Hattons, Roco or any other brand around the world.

We Guarantee that... and with every single output on each model having its own individual high power Capacitor Discharge Unit (CDU), solder-free connections, frog power control, choice of DC or DCC power supply, analog DC or digital DCC operation via push-button or momentary switches and connection points for control panel indication, there is nothing more you will need to buy or install! Being so complete, they are also incredibly economical compared to other brands, as you will not need to add more cost for microswitches or added time and frustration in installation.

**ADS-8sx.** An 8-output Solenoid Decoder for AC, DC and DCC layouts. **£89.95**

**> AND... It is not just Solenoid decoders that are arriving**

*Many new things are arriving soon...*

*Small items such as ready-to-use, pre-wired [Chrome mounted panel LEDs](#) in half a dozen colours including red + green, [flat fronted 3mm LEDs](#) for more realistic lighting & [back-to-back gauges](#) for OO/HO.*

*And of course some more significant things are arriving within a day or two, including [Cobalt iP Digital](#) and [Cobalt iP Analog](#) point motors, so now will be a very good time to log on to [www.dccconcepts.com](http://www.dccconcepts.com)!*

**DO support your local dealer if you can. Having a specialist model railway store close by is a great advantage for ANY modeller, and if you do not support them when you can, you will lose them.**

In addition to the UK, we also have dealers across the EU and around the world - you'll find these on Google Maps [HERE](#).

*Richard Johnson* and all of the staff at DCCconcepts
