> Back in stock now!

We had originally intended to stop selling these but you asked us to continue as with the death of some high street parts retailers, they were incredibly hard to find now at a reasonable price.

We have them all back in stock and they are being packed ready for sale right now! Ready to use with 300mm leads, including a resistor that makes them safe for use at 12-15v. All models are the same price, including the red + green. In packs of SIX at £8.95... really great value when one major parts supplier sells just the chrome housing with no LED in it for £2!

And of course some more significant things are arriving within a day or two, including [Cobalt iP Digital](#) and [Cobalt iP Analog](#) point motors, so now will be a very good time to log on to www.dcccconcepts.com!

DO support your local dealer if you can. Having a specialist model railway store close by is a great advantage for ANY modeller, and if you do not support them when you can, you will lose them.

In addition to the UK, we also have dealers across the EU and around the world - you'll find these on Google Maps [HERE](#).
